Re: Use of Non Tyton® Licensed Gaskets in McWane Ductile Products

The use of Tyton® licensed gaskets is a critical factor in the performance of McWane Ductile Tyton® and TR Flex® pipe and fittings products. This ensures that they conform with the latest Tyton® designs and specifications and that they're compatible with our pipe and fittings.

Please be aware that the use of any non Tyton® licensed gaskets, either restraining or non-restraining, in McWane Ductile Tyton® and TR Flex® pipe and fittings products, or the pipe and fittings products manufactured by the former companies that comprise McWane Ductile—Atlantic States Cast Iron Pipe Co, McWane Cast Iron Pipe Co, Clow Water Systems, and Pacific States Cast Iron Pipe Co—shall automatically void all warranties provided by McWane Ductile—or its former companies—with respect to its Tyton® and TR Flex® pipe and fittings products.

Please note that the communication does not extend any warranty by McWane Ductile to any accessory products, including restraining and non-restraining gaskets, other than those sold directly by McWane.

Please contact your McWane Ductile Sales Representative with any questions.

Best regards,

A handwritten signature in blue ink, appearing to read 'Mike Dodge', with a stylized flourish at the end.
